1. Overview

Receive Factur-X / ZUGFeRD vendor invoices: extract embedded CII XML from PDF/A-3, validate EN 16931, map to draft bills

Turn the structured e-invoices your vendors send into ready-to-review draft vendor bills. As EU reception mandates land (Germany since 2025, Belgium & France 2026), every buyer must be able to *receive* and process structured Factur-X / ZUGFeRD invoices — this module does exactly that.

2. Key Features

- Extract the embedded CII XML from a hybrid Factur-X / ZUGFeRD 2.x PDF/A-3
- Parse UN/CEFACT CII (the EN 16931 second syntax) into the full semantic
- Validate against EN 16931 business rules (seller identifiable, line↔tax
- Map to a draft vendor bill: match the vendor by VAT (then name), match

3. How to Use

Install the module from Apps, then open its menu from the Odoo top bar. Configure the settings, then use the documented screens to run your workflow.
