1. Overview

Turn signed contracts and milestones into scheduled invoices automatically

Convert signed contracts into a billing schedule and let Odoo raise the invoices for you. Supports recurring billing (weekly/monthly/quarterly/yearly), one-off and milestone-based billing lines, automatic renewal of expiring contracts, and a daily cron that posts due invoices.

2. Key Features

- Contract records with start/end dates, billing frequency and renewal policy.
- Billing lines: recurring, one-off and milestone — each generates a customer invoice.
- Milestone tracking: a milestone only bills once it is marked complete.
- Automatic next-invoice-date roll-forward per the chosen frequency.
- Daily scheduled action that generates and (optionally) posts due invoices.
- Auto-renewal: expiring auto-renew contracts extend by their renewal term.
- Manual "Generate Invoices Now" wizard for ad-hoc runs over a date range.

3. How to Use

Install the module from Apps, then open its menu from the Odoo top bar. Configure the settings, then use the documented screens to run your workflow.
