Plastic Packaging Tax Tra

User Guide · Odoo 18.0 & 19.0

Track packaging weights, recycled content and UK PPT quarterly liability

pokutsoft.com

1. Overview

Plastic Packaging Tax Tracker (UK) ==========

Get UK Plastic Packaging Tax (PPT) data out of spreadsheets. Define your plastic packaging components with weight and recycled-content percentage, record movement lines (manufactured or imported quantities) per period, and the module computes each quarter's chargeable tonnage and PPT liability using the configurable rate. A quarterly worksheet rolls up taxable vs. exempt weight ready for the HMRC return — you keep control of the actual submission.

Key features ---------- * Packaging component master: unit weight, recycled-content %, and the 30% recycled-content exemption automatically applied. * Movement lines per period (manufactured / imported), with computed plastic tonnage, taxable tonnage and exempt tonnage. * Quarterly worksheet: aggregates all movements in a period, applies the PPT rate, shows taxable weight, exempt weight, below-threshold relief and the resulting liability; draft -> confirmed -> submitted lifecycle. * Company-level PPT settings: current rate per tonne, recycled-content threshold, de-minimis annual tonnage threshold. * Period generator wizard and a clear audit of how each figure was derived.

This is a data-preparation and worksheet tool. It does not file the return with HMRC; submission remains the registered business's responsibility.

2. Installation

Open Apps, click Update Apps List, search for “Plastic Packaging Tax Tra” (technical name **gb_plastic_packaging_tax_tracker**) and press Install. The module supports Odoo 18.0 and 19.0, Community and Enterprise.

3. Menus & Navigation

After install the following menus become available:

- Plastic Tax
- Worksheets
- Generate Worksheets
- Components
- All Movements

4. Feature & Data-Model Reference

The app implements the following records and engines:

Model	Purpose
ppt.movement	Plastic Packaging Movement Line
ppt.component	Plastic Packaging Component
ppt.worksheet	PPT Quarterly Worksheet
ppt.period.generate	Generate PPT Worksheets for a Year

5. Typical Workflow

1. Open the app's Configuration menu and set up the master data / policies it needs.
2. Create the main operational record from its primary menu.
3. Use the action buttons on the form (e.g. Confirm / Compute / Post / Generate) to run the engine.
4. Review the results in the list, pivot and report views; export or post where applicable.

6. Support

Email **support@pokutsoft.com** or visit **https://pokutsoft.com**. Please include your Odoo version (18.0 / 19.0) and the module technical name.
