1. Overview

Watch any Odoo metric and alert on threshold or trend via email or BYOK webhook

Numbers drift. A conversion rate slips, stock value creeps up, overdue invoices pile on - and nobody notices until month-end. This module lets you watch any metric in your Odoo database and get alerted the moment it crosses a line.

2. Key Features

- Define a KPI against any model with a domain and an aggregate (count, sum, average,
- Set threshold rules: above, below, equals, or percentage change versus the last
- Each measurement is stored, so you build a full history and can chart movement.
- When a rule trips, the module raises an alert and notifies your team by email or by
- A scheduled action evaluates every active KPI on a cadence you control; alerts

3. How to Use

Install the module from Apps, then open its menu from the Odoo top bar. Configure the settings, then use the documented screens to run your workflow.
