1. Genel Bakış

Hepsiburada doğrudan API: sipariş çekme, varyant bazlı listeleme, kategori zorunlu öznitelik eşleme + değer çevirisi, stok/fiyat, kargo

Direct integration with the Hepsiburada MPOP v2 API - no third-party platforms or middleware required.

2. Temel Özellikler

- MPOP v2 API client: real client against the documented Hepsiburada
- Order Sync (pull): cron pulls orders from the last 24h via
- Product Push: "Push to Hepsiburada" button on the product form (and
- Variant Management: each Odoo product variant is pushed as its own
- Stock & Price Sync: hourly cron (off by default) pushes current
- Full Pagination: order import walks every offset page, so high-volume
- Idempotent Push: re-pushing a listed product updates its price/stock
- Multi-Warehouse Stock: quantity is read from the configured warehouse,
- Currency Conversion: prices are converted to the configured marketplace
- Rate-Limit Handling: honors HTTP 429/503 with Retry-After and bounded backoff.
- Import Result Polling: product import batches are polled by tracking ID and
- Shipment Tracking (push): action_push_tracking_to_hepsiburada posts

3. Kullanım

Install the module from Apps, then open its menu from the Odoo top bar. Configure the settings, then use the documented screens to run your workflow.
