1. Overview

New Zealand payday filing: build the IRD Employment Information (EI) return file per pay run with IRD-number validation, ESCT and KiwiSaver — own models, no Enterprise dependency.

Prepare and build the Inland Revenue Employment Information (EI) return for every payday, ready to upload through your own myIR / gateway services credentials (BYOK). Built on hr + hr_contract (Community — no Enterprise hr_payroll dependency); the file-building engine is pure Python and fully unit tested.

2. Key Features

- Employment Information return — one EI document per pay run, with the
- IRD file-upload format — a record-typed CSV (HED header, DET detail
- IRD number validation — the official Inland Revenue weighted modulus-11
- ESCT — the employer superannuation contribution tax is computed from each
- Two-working-day deadline — the statutory EI filing due date is computed by

3. How to Use

Install the module from Apps, then open its menu from the Odoo top bar. Configure the settings, then use the documented screens to run your workflow.
