1. Overview

Peppol BIS Billing 3.0 generator preset pack: per-country EAS endpoint scheme defaults + SEPA payment-means presets (Belgium)

Belgium Peppol BIS Billing 3.0 — preset pack

A Peppol BIS Billing 3.0 (EN 16931) UBL 2.1 generator preset pack focused on getting cross-border B2B invoices *accepted* by the receiving Access Point. The two fields that most often cause rejections — the per-party EndpointID/@schemeID (the Peppol Electronic Address Scheme, BT-34 / BT-49) and the payment-means / financial-account block (BT-81) — are filled from a curated, editable preset registry instead of left generic.

2. Key Features

- Per-country EAS endpoint scheme defaults — the correct Peppol Electronic
- Endpoint format validation — light structural checks per scheme (Belgian
- SEPA payment-means presets — SEPA credit transfer (UNCL4461 code 58),
- Peppol BIS UBL generation — stamps the BIS 3.0 CustomizationID /
- BIS 3.0 business-rule validation — a Peppol rule set layered on the
- BYOK Access Point transport — optional connection record with editable
- Onboarding wizard, configuration model, optional batch cron, full
