1. Overview

Peppol enhancement satellite: multi-endpoint routing per partner, UBL attachments, inbound MLR / invoice-response notifications

A Peppol enhancement satellite for the e-Invoice Core Engine that fills the gaps Odoo's minimal Access Point integration leaves open. Built for the wave of EU national e-invoicing mandates clustering in 2026-2028 under the ViDA package, where Peppol BIS Billing 3.0 is the default transport.

2. Key Features

- Multi-endpoint routing per partner — declarative routing rules resolve,
- Peppol participant identifiers (EAS) — a built-in ISO 6523 / Peppol EAS
- UBL attachments — embed the human-readable PDF rendering and supporting
- Inbound notifications (Alwinen-pattern) — parse the asynchronous
- BYOK Access Point client — submit, poll status, SMP lookup and pull
- Peppol pre-send validation — a Peppol BIS Billing 3.0 rule set layered on
- Onboarding wizard, routing-rule manager, inbound-poll cron and full

3. How to Use

Install the module from Apps, then open its menu from the Odoo top bar. Configure the settings, then use the documented screens to run your workflow.
